

DIWALI SALES DATA ANALYSIS – BUSINESS INSIGHTS FROM CONSUMER TRENDS

Objective:

The primary goal of this analysis was to derive meaningful insights from Diwali season sales data. By understanding customer demographics, purchasing behavior, and regional trends, businesses can refine their marketing and product strategies for upcoming festive campaigns.

Exploratory Data Analysis (EDA):

Gender-Based Insights:

- **Female customers outperformed male customers** in both number of purchases and total sales.
- **Purchasing power of women** was significantly higher during the festive season.

Customer Gender Distribution

Sales Comparison by Gender

Age Group Analysis:

- Most purchases came from customers aged 26–35, especially females.
- This age group represents a **key target segment** for festive campaigns.

Customer Distribution by Age Group and Gender

Total Sales by Age Group

State-Wise Performance:

- **Top states by number of orders:** Uttar Pradesh, Maharashtra, Karnataka.
- **Top states by total sales amount:** Uttar Pradesh, Karnataka, Maharashtra.
- UP emerged as the **highest-contributing state** in both orders and revenue.

👤 Marital Status:

- **Married individuals, especially women,** showed higher buying tendencies and higher spending.
- Marriage-related festive spending likely contributed to this spike.

Occupation Analysis:

- Highest number of buyers were from **IT, Healthcare, and Aviation** sectors.
- These professions showed the **strongest purchasing power**.

Customer Distribution by Occupation

Total Sales by Occupation

Product Category Trends:

- **Top-selling product categories:**
 - **Food**
 - **Clothing**
 - **Electronics**
- These categories dominated both in terms of **purchase volume** and **revenue generation**.
